Enforcement & Verification

How credentials, field audits, and work records are intended to connect.

Updated October 15, 2026 · Plain-language summary

Printable web reading guide · 11 November 2026

This reading guide summarizes ATG's supplied documents. The program is in development; descriptions of intended services are not announcements that enrollment or delivery has begun.

Verify the work where it happens

The framework calls for credential checks before deployment, records linking the actual crew to the scope, and field audits that test whether the work matches the paperwork. Audits may be scheduled, unannounced, or triggered by an incident or complaint.

Defined authority

ATG field enforcement and stop-work authority apply only within agreed ATG-managed or ATG-aligned scopes. ATG does not claim regulatory authority over the industry. Phase 2 uses controlled overflow scopes. Phase 3 uses the employer's production work under an Employer Acceptance Agreement and continuing sponsor oversight.

Independent decisions and a path forward

Safety standards and credential decisions have separate responsibilities under the Governance Map. Adverse determinations require written grounds and an appeal route to people who did not make the original decision. Verification is designed to carry no cost to the worker and no subscription charge to the requesting employer.
