Market Alignment & Pricing Integrity

Make the real cost of safe, competent work visible.

Updated October 15, 2026 · Plain-language summary

Printable web reading guide · 11 November 2026

This reading guide summarizes ATG's supplied documents. The program is in development; descriptions of intended services are not announcements that enrollment or delivery has begun.

Doing the job right has a cost

The framework brings labor, supervision, training, safety equipment, insurance, documentation, and realistic scope duration into the same cost picture. Its purpose is to help buyers evaluate whether a proposal can support compliant execution.

Evidence for better decisions

The proposed approach links cost baselines with observed safety, quality, rework, and documentation performance. Pilot evidence is intended to help buyers compare what they receive for the price, rather than treating every bid as equivalent.

Advisory and voluntary

This is not a fixed price list or a power to set rates. ATG cannot compel a carrier or agency to accept or reject a bid. Adoption depends on the usefulness of the evidence and the agreements participants choose to make.

The source includes dated funding-policy commentary. It is supplied as ATG's framework, not a live grant-availability guide; any program application requires current eligibility confirmation.
